

DTD

CATALOG
ONLINE VERSION

'26.

Dear Friends,

Here is our 2026. online catalog.

It includes all models currently in our offer. Last two years we presented many new models and they are all here inside this catalog. Latest news are NEON, REAL FISH - new generation, PROJECTILE DIAMOND...

I am sure you will enjoy using our new products and confident they will bring you a lot of happy moments on the sea.

Enjoy our new online catalog and stay tuned...more things are coming! Thank you for making it possible. We wish you a lot of health and good fishing!

INSTRUCTIONS TO USE LONG CASTING MODELS

DIRECT CAST is new system for long cast developed by our team. It allows squid jigs to cast long distances and operate automatically. The system works on the principle of weight movement within the body, and significantly simplifies the use of the product itself. It removes the need for rare materials and it removes the need to manually activate the product before the casting.

STEP 1.

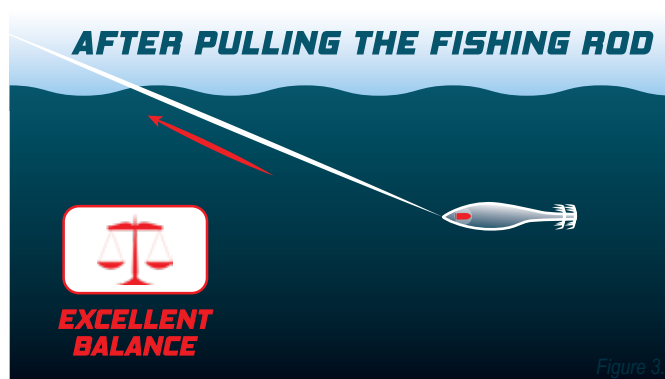

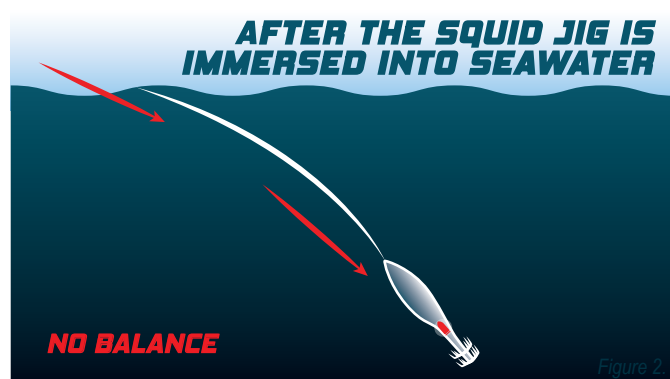

Cast the product normally, like you usually do.

STEP 2.

When squid jig falls into the sea, the inner weight is in the tail and squid jig sinks toward tail - there is no balance (Figure 3).

After a few seconds of sinking down, you must pull the fishing rod in short motion. The inner weight is transferred from the tail to the head and the squid jig has a good balance (Figure 4).

PROJECTILE Diamond *DEEP* 3.0 S/M

- special body design
- slim body - small air resistance

2 FISHING ACTIONS

2 FISH TAILS
IN PACKING

Order no.	NAME	TYPE	BODY	WEIGHT	LENGTH	COLOR	SINK. SPEED
20055	PANIC EGI 3.0	cloth	luminous	14,6 g	96 mm	B, G, R, O, P, BK, RH	6,5 s/m (without tail 5,5 s/m)
20056	PANIC EGI 3.5	cloth	luminous	17,7 g	105 mm	B, G, R, O, P, BK, RH	6,5 s/m (without tail 5,0 s/m)

PANIC EGI is squid jig with unique characteristics. It is hybrid between standard conventional squid jig and trolling squid jig. With specially designed **plastic fish tail we gave natural "fish like" motion to the product**. This tight wobbling action is very natural and persistent no matter how slow you pull the product, making this product irresistible to squids and cuttlefishes.

Another great characteristic of **PANIC EGI** is a possibility to simply choose the action.

Patented "**ACTION CLICK SYSTEM**" enables you to change the action by adding or removing the plastic fish tail in 3 easy and fast steps. If you want tight wobbling action just add the tail, if you want classic (standard) straight line action, just remove the tail.

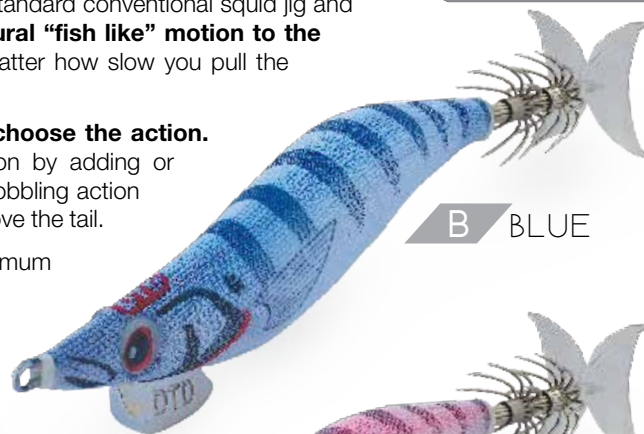

With these options, you can make the most of your fishing and get maximum results.
